

Master Practitioner of NLP | Transforming Leadership | Mindset Coach

"I am ready to be your partner if you are ready and willing to conquer your inhibitions." - Naheed Khan

Naheed Khan is a renowned Master Practitioner of NeuroLinguistic Programming (NLP) and Mindset Coach, based in the UAE. An ex- consultant to the Government of India and a transformational leader with 17+ years of experience as a Change Catalyst, Naheed Khan has been inspiring people and transforming their lives.

She is widely acclaimed as a transformational business and leadership coach, who believes in bringing out a paradigm shift in the mindset, leading to internal positive change. Tapping into the power of the mind, and internal dialogue; through NLP and her over 17 years of experience as a Change Catalyst, aids her to bring out the desired balance, optimize potential, and bring a sense of fulfilment in her client's personal and professional lives.

Naheed Khan has extensively worked with corporates and leaders spanning 6 countries and has successfully designed programs to cater to the specific goals of the clients. She has helped executives align their mindset, expectations and performance to stand unto the challenge of becoming Future Leaders.

Naheed is also a Design Thinking Expert, wherein she applies the concept to bring self-transformation and business turnaround. She also works with individuals, through tailor-made programs to address their specific requirement and make the life-changing impact.

Her organization was awarded the prestigious "Best Professional Coaching and Development company- Middle East" award in 2020, which is a testimony to the commitment and values of her organization. She has also been a motivational speaker at many forums and contributes for youth empowerment to help them break their limiting beliefs and equip them with the mindset to lead the future.

As a coach Naheed is working with clients all across the globe, and has dedicated herself to facilitating transformation in their life by unlocking the power of the human mind.
